

WatchBP[®] office AFIB

Dual-cuff blood pressure (BP) measurement and atrial fibrillation (AFIB) detection with built-in auscultatory measurement function

Benefits:

Dual-cuff design for convenient, simultaneous measurements of Inter-Arm-Difference (IAD).

One touch for detecting BP value and AFIB condition.

microlife[®]

WatchBP[®] office AFIB

Innovative AFIB Screening

- Microlife's AFIB detection technology screens for AFIB with proven sensitivity and specificity.
- Conveniently screen for AFIB while monitoring blood pressure.

	Subject (n)	Readings used	Readings needed for diagnosis	Sensitivity (%)	Specificity (%)
• Stergiou [1]	72	1	1	93	89
		3	2	100	89
• Wiesel [2]	405	1	1	95	86
		3	2	97	89

WatchBP Office Afib screens for Afib with high accuracy at 97% - 100% Sensitivity and 89% Specificity while measuring blood pressure. It is so easy and convenient.

WatchBP Office Afib

- ✓ Simultaneously screening for AFIB and IAD
- ✓ Ideal tool for population screening and diagnosis for stroke and heart disease.
- ✓ Screening for AFIB & IAD is recommended by leading medical societies [3]

Screen for AFIB & IAD
A leading risk factor for stroke.
